

Use Visuals

Most children with autism find it easier to understand the world through images.

Any idea what the Swedish word **träd** means?

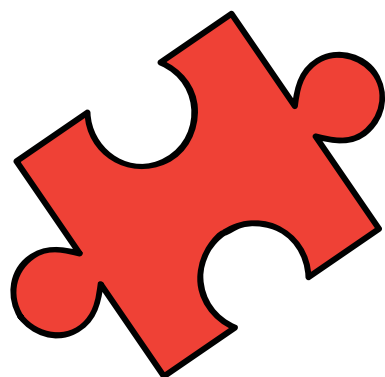

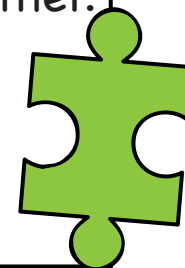

How about now?

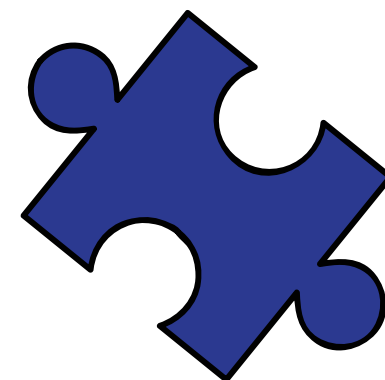

Think Unique

Every child is unique, so what works for one child will not automatically work for another.

Be **flexible** and open to new ideas!

BE AUTISM AWARE

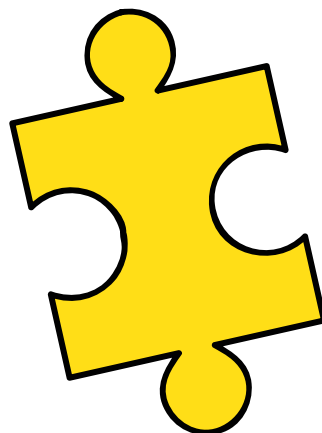

Be Clear

Say what you mean and use simple and clear language.

Avoid things like:

sarcasm, metaphorical speech or exaggeration.

You'd lose your head if it wasn't screwed on!

A Safe Place

It is really helpful for children to have a quiet and stress-free place where they can go if they feel stressed or very anxious.
